

Mc Switch

Pressure switch with CE certification.

Automates the function of a water pump based on the pressure. Adjustment range from 1 to 5 bar with factory setting at 2.0 - 3.0 bar.

Made with high-quality materials and robust electrical contacts.

Pumps Residential

Operation:

When the pressure reaches the cut-off pressure limit, the device automatically cuts off the power and the pump stops functioning.

When the system pressure reaches the cut-in pressure limit, the power is automatically restored and the pump is restarted.

Suitable for single-phase pumps up to 2 Hp.

Features:

- For single-phase pump
- Adjustment range 1.0 - 5.0 bar
- Factory setting 2.0 - 3.5 bar
- Electrical rating 16(8)
- IP 54 protection degree
- Swivel female connector \varnothing 1/4"
